Featuring classic control schemes and an immersive new cockpit view, Airplane Mode will give players a chance to experience what it's like to be a passenger on a real-life flight. Airplane Mode is one of the new 'Fly Flight Simulator' games. This is a new genre of games in which you control a plane as it flies in real-time. Airplane Mode was developed to be a realistic experience and has been tested as such. At first glance, Airplane Mode looks like an ordinary flight sim, but that's a surprise right there. After all, how are you going to test your game when the pilot is strapped down? We figure everyone has their own way of figuring out just how much control they have over their life, so why not give us a go on Airplane Mode? Time to fly, but in real life, right? The leader of the most powerful community of STALKER fans, the Counter-Strike: Source Alpha Team has once again demonstrated the true potential of the game by making a multiplayer map that will blow your mind. It took the team a mere 18 hours to create the epic game mode, Arktech, but it will definitely be remembered by the gaming community as the most detailed and fascinating map ever. After only 18 hours of designing and creating, the developers have put together the most original map in history. Stalkers are about to face their most challenging and frightening mission yet. Arktech, a map with a story. The team decided to make a throwback to the beginnings of the franchise by creating a two-story, urban based map. The map consists of two levels. A rooftop base and a lower platform for infantry. Arktech is based on a new type of gameplay as the developers introduced a bright, dynamic, and creative design. The map has been carefully designed, almost as if modeled on the storyboards of a Hollywood blockbuster. Just like the first missions of the Alpha Team, the map's code is a constant source of excitement. True to the developers' unwavering commitment to its fans, Arktech contains a wealth of content. - 2 unique gamemodes: Free for All and Team, with the option of either the classic or the innovative and original Trolley Driver gamemode. - 5 roles: Assault, Sniper, Engineer, Medic and Demolition. - A new high-contrast lighting system featuring new levels of detail and the highest quality graphic engine ever c9d1549cdd

by Rail Chris Hadfield Excellent work Chris! Thanks for your great service. I have filed an Immediate Action Form about the Head Warming Tube. My BSL is still in the process of training. Have a good day and keep up the great work! You reached a hole in one today, I'm so proud of you. Beatrice April 2012 My favourite picture of Chris, taken by William Anderson. Note the illuminated globe. Chris shot it while experimenting with the Glasgow to Aberdeen stretch of track in Dec 2010 to test the J1C155 locomotive with Solid State Interlock. "On the 27th of December at about 00:50 hours, Colonel Hadfield sailed down the stairs and out of the Mission Control Center on the International Space Station. He paused on the way down just long enough to salute the assembled astronauts and the Canadian crew of the Space Station. 'I'll see you on the ground,' he said, and then he boarded the Soyuz for his ride back to Earth. By the time he arrived I Love You half an hour later, his capsule was docked safely with the ISS. Happiest of Christmases.' Chris had sent a picture of the plaque he had made for the Royal Mail to the press office at NASA and this was in their inbox while he was in orbit. 'The space station is alive tonight. This sterling workhorse has been keeping us alive and well for the past 11 days. We are thrilled to have had Colonel Chris Hadfield onboard the ISS.' Royal Mail was so pleased and gave Chris the £30 required for the construction of the box and started work on the ground immediately. 5 days, 5 nights, and £30 in the bank. Ahh, Christmas! December 20th 'It was a very emotional experience,' he recalls. 'I always have really mixed emotions, down on the station but also you're just really proud of yourself because you've been up there, you've done it, no one else has and you've done it multiple times. The wait began. Chris wanted to make every second count and was going to make every second count. He was only going to live once so he was not going to waste any. Ready to tuck into his breakfast on launch day. He opened up the operating procedure, read through the plans, prepped the space toiletries box and

Practical Shooting Simulator simulates your real life practical shooting stages. It provides you with a stage editor, planning editor, character editor, firearm editor, and allows you to play practical shooting videos. Live host is bound to the character editor. The web version allows you to create stages, and you can share them with friends. Scoring is extremely accurate, and you can receive mail notifications when scoring is available. Practice under the guidance of a host at any moment of any day. Enjoy live coaching and sharing by the host. In the simulator, the host will coach you, and even give you tips during the stage. You can take part in live practical shooting events for free, the simulator also supports online shooting. So what are you waiting for? Have fun, share your skills, and share the stages with others. Fluent Design of the Editor: Easy to use, and fast to learn. Three unique editors: Stage, Planning, and Character. A rich arsenal of special tools: Just think of everything a real stage requires: obstacles, partitions, targets, and much more. Advanced Action Sequence System: You can solve any stage with as little as 3 actions. All actions are used in the simulator in a correct way. If you have a real or the simulator, every action also has its own standard results. Skills can be tied to the actions. You can change the skills definition at any moment, and its effect will be felt for the rest of the duration of your action. Simple and intuitive editor. Advanced Statistics: High-quality statistics. Detailed statistics for each stage allows you to identify weak points of the stage. After you are done with the stage, check out your stats to help you improve. Use in real life, because you can check your results. Email Notification: Get a notification via email when the results of your stage is available. This allows you to test your abilities, and later compare the results with those of other participants. Fast iterations: Try different equipment, and try out a completely new stage in seconds. This is also a convenient mode of changing the stage parameters. Free shooting online: Practice live with your web cam. A bright 3D web camera is included. Upload your best stage to share it with others. Live hosts: Get live support from the host. Coaching in the simulator includes checking your physical state, or
