Rise of Tarnished is a fantasy action RPG (RPG) where you play a member of the Second Continent's Elden Army in the Lands Between in a setting in which many parallel universes exist. The game is separated into three elements: 1) You advance the story by exploring the Lands Between and completing side-quests to unravel the mysterious mystery. 2) You can freely customize your character by equipping weapons, armor, and magic, and upgrade their skills to deal massive damage. 3) The online multiplayer allows you to directly connect with other players and travel together. Ask YC: Online Collision Avoidance System? - DaveyWilliams Does anyone know if there exists an online collision avoidance system already? I'm thinking of a system where a list of nodes/houses in a large room is maintained and collisions are avoided using various algorithms, similar to the system used in Astar. Thanks ===== dfranke ~~~ DaveyWilliams That's an awesome idea, but I don't see what it has to do with avoiding collisions of objects. Here are some more ideas on a collision avoidance system: [ ~~~ rms The system Garetto suggests is like a multilayer collision detector that avoids two-body collisions with changes in velocity. An ant-like flocking model would avoid two-body collisions even when they happen from an unobserved view. It's the sort of system that occurs naturally in a firefly system or in a complicated flocking algorithm where you have naturally different speeds and directions in your group. ----- babul On the server side, you can build it on top of Jitterbug: ~~~ DaveyWilliams That's a really interesting idea. ----- jey 2d game engine: There's a Python implementation. ----- ashleyw I've seen collision avoidance systems before. If you google for it, there are lots of results, depending on your definition of 'online'. ----- andr They are around if you look hard enough, and there is a long history, including some good papers. ----- ZeroGravitas There's a lot of theory around this. There's quite a lot of stuff about beacons, and
